Indore,India

SKILLS

Frontend: React.js, React Hooks Context API, Redux / Redux Toolkit, TypeScript, Next.js, JSX Component-Based Architecture

- **UI / Styling**: Tailwind CSS, Material UI (MUI), Styled, Components, Responsive Design
- **APIs & Data**: REST API Integration, GraphQL, Axios / Fetch, JSON Handling
- **Build & Tools:** Webpack, Vite, Babel, npm / Yarn
- **Testing Tools**:Jest, React Testing Library, Cypress
- **Other Tools:** Git / GitHub, Performance Optimization, State Management, Debugging & Chrome DevTools, Agile / Scrum, Public Relations, Teamwork, Time Management, Leadership, Effective Communication, Critical Thinking

PROFILE

Skilled AI Developer and React Native Engineer with 6 years of hands-on experience building intelligent systems, cross-platform mobile apps, and scalable architectures. Strong background in machine learning, deep learning, and modern mobile development. Passionate about solving complex problems with cleancode,automation,and AI-driven solutions.

WORK EXPERIENCE

Project name: Kasho

Sveltose Technologies pvt. Ltd.

Lead React Native Developer **Nov 2022 - Present**

Kasho is a React Native business management app that helps track operations, manage clients, and monitor transactions in real time. It includes an intuitive analytics dashboard and secure role-based access to ensure data privacy and efficient workflow control.

Roles & Responsibilities

- Developed key features, including transaction tracking, and an analytics dashboard.
- Implemented secure authentication, and API integration, and performance improvements across Android and iOS.

Project name:AyuhPlus

Sr React Native Developer

AyuhPlus is a React Native–based healthcare app enabling real-time doctor–patient communication through video/audio calls, secure chat, and flexible appointment booking. It also features GPS-based doctor discovery, a digital wallet, and integrated payment options for a seamless healthcare experience.

Roles & Responsibilities

- Built core React Native app features including video/audio calls, chat, appointments, GPS search, and payments.
- Handled API integration, notifications, testing, and performance optimization for a smooth and reliable user experience

Education

- Bachelor of Technology in Information Technology

LANGUAGES

English (Fluent)
English

Project name:MyUmma

React Native Developer

A community-focused React Native app that keeps users updated with events, announcements, and important updates—designed with smooth navigation, secure authentication, and an accessible user interface.

Roles & Responsibilities

- Built front-end screens,reusable components, and integrated backend APIs for events, announcements, and user data.
- Implemented secure authentication flows and optimized overall app performance.
- Collaborated with the team, handled debugging/testing, and maintained code quality using Git

Project name: AuraVoice **Cyber Instant Pvt. Ltd**

React Native Developer **Sep 2019 to Oct 2022**

Exotal is a React Native–based communication app designed to enable seamless SIM-to-SIM voice calling, along with features like call history management and contact list synchronization for a smooth user experience. The app focuses on providing fast, reliable, and high-quality calling capabilities while keeping user contacts and call logs updated in real time.

Roles & Responsibilities

- Built key calling features like SIM-to-SIM calls, call history, and contact sync for a smooth user experience.
- Integrated APIs and optimized performance, handling testing, debugging, and UI improvements for reliable calling across Android and iOS.

Project name: HRM

HRM is a React Native app that streamlines HR operations such as employee records, leave management, payroll, and performance reviews, with secure role-based access for Admin, Manager, and Employee users

Roles & Responsibilities

- Developed core HR modules including employee records, leave management, payroll, and performance workflows.
- Implemented role-based login and integrated APIs, ensuring smooth functionality through testing, debugging, and performance optimization
